NO.         NO.   NAME
-----
```

NOTE:

1. Income data applies only to resident household members aged 6 and above.
2. Income earned by servants and other non-relatives does not add up to household income and is thus excluded from market activities and income tables.
3. Traditional midwives are categorized as self-employed and their income is based on a per delivery (per piece) basis.
4. When computing for income, always check the person's usual number of work days in a week and no. of hours spent working. This particularly applies to those holding seasonal jobs.
5. Persons working as stonecrafters are paid by kilo and not by piece.
6. Families who work as a group are often paid as a group. In such cases, income received was reflected only for the head of the group in the income tables. The rest of the group was assigned a missing value for income received.
